

RESEARCH TASK: BUILD PROVISIONAL T₀ CASE BASELINE

Build a provisional baseline dataset for Commonwealth v. Lindsay Clancy for use in testing an evidentiary-analysis system.

PURPOSE

This is NOT a request to determine what happened, assess credibility, decide guilt or innocence, or produce a narrative case summary.

The goal is to establish enough structured case context to analyze trial testimony while the primary-document ingestion pipeline is still under development.

Treat all research-derived information as PROVISIONAL. It will later be reconciled against primary court documents, evidence packets, exhibits, and transcripts.

CORE DOCTRINE

Present structure. Never evaluate.

Preserve distinctions between:

1. What a primary record documents.
2. What a witness says happened.
3. What another person reportedly told a witness.
4. What prosecution asserts.
5. What defense asserts.
6. What a secondary source reports.
7. What remains unknown or disputed.

Never convert "X reported Y" into "Y happened."

Never infer credibility.

Never assign evidentiary weight.

Never calculate guilt/innocence probability.

UNKNOWN is a valid result.

SOURCE PRIORITY

Prefer, in order:

1. Court records / exhibits / official records
2. Trial transcripts and courtroom video
3. Contemporaneous documentary records quoted or displayed in court
4. High-quality local/national trial reporting
5. Other secondary reporting

Do not use social-media commentary, Reddit, unsourced case summaries, or true-crime commentary as factual authority for the baseline.

When only secondary reporting is available, explicitly label the record:

SOURCE_STATUS = SECONDARY_REPORTED

FIVE-PRIMITIVE OUTPUT MODEL

Express extracted information using:

ENTITY

Persistent identities:

people, organizations, facilities, locations, devices, documents.

EVENT

Real-world or proceeding occurrences.

Events may remain EVENT_CANDIDATE when not sufficiently established.

EVIDENCE

Source-bearing material:

records, transcript passages, exhibits, journal passages, digital artifacts, photographs, reports, and evidence-backed assertions.

RELATIONSHIP

Addressable connections:

asserted_by

reported_by

observed_by

derived_from

references

concerns

before

after

treated_by

documented_in

introduced_by

claimed_causes

supports_projection

conflicts_with

same_known_origin

PROJECTION

Interpretive or organizational views over the substrate:

prosecution theory

defense theory

witness account

timeline

event neighborhood

proposition bundle

Claims/assertions may be represented as evidence-backed assertion objects but must retain their exact attribution and source.

THREE CLOCKS

For every relevant item distinguish:

CLOCK 1 — PROCEEDING ORDER

When the information entered the court/trial record.

CLOCK 2 — REAL-WORLD EVENT TIME

When the referenced event allegedly occurred.

Allow:

EXACT

APPROXIMATE

INTERVAL

RELATIVE

UNKNOWN

Do not manufacture exact timestamps.

CLOCK 3 — INFORMATION ORDER

Where the information entered the available case record and what information derives from what.

Keep provenance characteristics such as derivation depth separate from logical ordering.

RESEARCH OUTPUTS

Produce the following sections.

A. CANONICAL ENTITY REGISTRY

For each known person/organization/location:

entity_id

canonical_name

aliases

entity_type

known_role

source

source_status

Do not create credibility profiles.

B. PROVISIONAL EVENT REGISTRY

For each important pretrial/incident event:

event_id
neutral_description
participants
event_time
temporal_precision
location
asserted_or_documented_by
supporting_sources
conflicting_sources
status

Prefer descriptions such as:

"Patrick Clancy reported finding..."

rather than:

"Patrick Clancy found..."

unless the latter is independently documented at the appropriate level.

C. TEMPORAL ANCHORS

Identify timestamps or intervals that appear particularly important for later reconstruction.

For each:

temporal_assertion_id
event_id
time/range
precision
source
asserted_by
basis
conflicting_temporal_assertions

D. PROVENANCE / INFORMATION CHAINS

Identify important claims where information passed through multiple people or records.

Example structure:

originating_source
→ recipient
→ record
→ witness testimony
→ transcript/report

Mark:

same_known_origin
apparently_independent
partially_shared_lineage
unknown_lineage

Do not call repeated downstream reporting independent corroboration unless independence is actually established.

E. IMPORTANT PROPOSITIONS

Create neutral proposition IDs for recurring factual questions likely to appear throughout testimony.

For each:

proposition_id
neutral_question/proposition
claims_supporting
claims_conflicting
source_lineages
status = UNRESOLVED unless established by appropriate primary evidence

Examples of proposition categories may include:

mental-health treatment
medication changes
reported symptoms
sleep
hospitalizations
events of January 24
911/response
hospital arrival
injuries
digital activity
medical observations
statements attributed to Lindsay
statements attributed to Patrick

Do not determine which proposition is true.

F. PROSECUTION T₀ PROJECTION

Using opening statements and clearly attributed prosecution representations, identify what the prosecution says occurred.

Every element must be labeled:

PROJECTION = PROSECUTION

and linked to the underlying claims/evidence it appears to rely upon.

Do not convert prosecution assertions into substrate facts.

G. DEFENSE T₀ PROJECTION

Do the same independently:

PROJECTION = DEFENSE

Preserve defense assertions as theory/projection rather than substrate facts.

H. KNOWN EVIDENCE / DOCUMENT REGISTRY

Identify important evidence objects publicly known to exist:

warrants
affidavits
returns
medical records
journal
digital extractions
911/CAD records
photographs/video
forensic reports
other exhibits

For each classify:

POSSESSED
REFERENCED_NOT_POSSESSED
PUBLICLY_REPORTED
UNKNOWN

Do not imply that a referenced document has been reviewed when it has not.

I. BASELINE UNKNOWNNS

Explicitly list information the research cannot establish.

This is a first-class output.

Examples:

unknown originating source
unknown exact time
unknown exhibit
conflicting dates
secondary reporting only

underlying record unavailable
unclear whether accounts are independent

J. SOURCE REGISTRY

For every source include:

source_id
title
publisher/court
URL
publication date
proceeding date if known
source type
primary/secondary classification
which extracted records rely on it

IMPORTANT:

Publication date and proceeding date are separate fields.

FINAL VALIDATION

Before returning the dataset, check:

- No prosecution assertion has become a fact merely because prosecution presented it.
- No defense assertion has become a fact merely because defense presented it.
- No witness report has been converted into direct observation.
- No repeated claim has been treated as independent merely because multiple people repeated it.
- No approximate timestamp has become exact.
- No secondary article has silently become primary evidence.
- Every important record retains a source.
- Unknowns remain visible.
- No credibility, reliability, evidentiary-weight, guilt, or innocence scores appear.

Finish with:

V0 BASELINE LIMITATIONS

Explain exactly which portions should be replaced or reconciled when the primary evidence-packet parser becomes available.

Here is a provisional T₀ baseline dataset for *Commonwealth v. Lindsay Clancy*, structured per your five-primitive model and explicitly labeled as PROVISIONAL with source and provenance distinctions throughout. ^[1] ^[2] ^[3]

A. Canonical entity registry

Note: All entries are SOURCE_STATUS = SECONDARY_REPORTED unless and until primary records are ingested.

entity_id	canonical_name	aliases	entity_type	known_role / function	source / basis	source_status
ENT1	Lindsay Marie Clancy	Lindsay Clancy	person	Criminal defendant charged with three counts of murder in Plymouth Superior Court.	Reuters, AP, local trial coverage. ^[1] ^[3]	SECONDARY_REPORTED
ENT2	Patrick Clancy	Pat Clancy	person	Ex-husband of ENT1; father of three deceased children; prosecution and defense witness; civil plaintiff.	Boston 25, Boston Globe, USA Today, AP. ^[4] ^[2] ^[5] ^[3] ^[6] ^[7]	SECONDARY_REPORTED
ENT3	Cora Clancy	Cora	person	Child of ENT1 and ENT2; alleged homicide victim (approx. age 5 in Jan 2023).	Trial reporting and charges. ^[4] ^[5] ^[8]	SECONDARY_REPORTED
ENT4	Dawson Clancy	Dawson	person	Child of ENT1 and ENT2; alleged homicide victim (approx. age 3 in Jan 2023).	Trial reporting and charges. ^[4] ^[5] ^[8]	SECONDARY_REPORTED
ENT5	Callan Clancy	Callan	person	Child of ENT1 and ENT2; alleged homicide victim (approx. age 8 months in Jan 2023).	Trial reporting and charges. ^[4] ^[5] ^[8]	SECONDARY_REPORTED
ENT6	Commonwealth of Massachusetts	Commonwealth	organization	Prosecuting authority in criminal case.	General criminal-case framing. ^[1] ^[3]	SECONDARY_REPORTED

entity_id	canonical_name	aliases	entity_type	known_role / function	source / basis	source_status
ENT7	Plymouth County District Attorney's Office	Plymouth County DA	organization	Office prosecuting ENT1.	AP, local reporting. [3] [9]	SECONDARY_REPORTED
ENT8	Assistant District Attorney Jennifer Sprague	ADA Sprague	person	Prosecutor delivering openings; examining witnesses; moving on evidentiary issues.	Boston.com , Patriot Ledger, Boston Globe. [10] [11] [12]	SECONDARY_REPORTED
ENT9	Assistant District Attorney Shanan Buckingham	ADA Buckingham	person	Prosecutor delivering opening statement.	Boston 25, WJAR. [4] [13]	SECONDARY_REPORTED
ENT10	Kevin Reddington	Kevin J. Reddington	person	Lead defense attorney for ENT1.	Reuters, Boston 25, trial video. [11] [14]	SECONDARY_REPORTED
ENT11	Judge William Sullivan	Judge Sullivan	person	Presiding judge in Plymouth Superior Court criminal proceedings.	Boston.com , NBC Boston, WCVB, [15] [16] [17]	SECONDARY_REPORTED
ENT12	Plymouth Superior Court	Plymouth County Superior Court	facility	Trial venue for criminal case.	Reuters, AP, local coverage. [11] [3]	SECONDARY_REPORTED
ENT13	Duxbury home of Clancy family	Clancy residence	location	Alleged crime scene; family home in Duxbury, Massachusetts.	Boston Globe, USA Today, CNN. [2] [5] [18]	SECONDARY_REPORTED
ENT14	McLean Hospital	McLean	facility	Psychiatric facility where ENT1 had inpatient stay around Jan 1–5, 2023.	Trial coverage, timeline, lawsuits, [19] [10] [20] [21] [6]	SECONDARY_REPORTED
ENT15	Massachusetts General Hospital	MGH	facility	Hospital where ENT1 reportedly received emergency psychiatric care in late 2022.	Timeline and trial reporting. [10] [22] [20] [21]	SECONDARY_REPORTED
ENT16	Women & Infants Hospital Center for Women's Behavioral Health	Women & Infants program	facility	Postpartum behavioral health program in Providence/Rhode Island evaluating ENT1 in Dec 2022.	Boston.com timeline, Globe, trial coverage. [10] [20] [21] [23]	SECONDARY_REPORTED
ENT17	Aster Mental Health	Aster	organization	Outpatient psychiatric practice where ENT1 saw Dr. Tufts.	Lawsuit and timeline reporting. [6] [24] [7]	SECONDARY_REPORTED
ENT18	Dr. Jennifer Tufts	Tufts	person	Psychiatrist treating ENT1 from Sept 2022; named defendant in civil suits; trial witness.	Boston.com , Globe, lawsuits. [20] [21] [6] [7] [24]	SECONDARY_REPORTED
ENT19	Rebecca Jollotta	Jollotta	person	Psychiatric nurse practitioner treating ENT1 Nov–Dec 2022; named defendant; trial witness.	New York Post, Globe, lawsuits. [23] [20] [6] [7] [24]	SECONDARY_REPORTED
ENT20	Dr. Alia Goodheart	Goodheart	person	McLean psychiatrist treating ENT1 during Jan 2023 inpatient stay; trial witness; civil-suit defendant.	ABC11, Boston 25, Globe. [19] [20] [25] [6]	SECONDARY_REPORTED
ENT21	Massachusetts State Police	MSP	organization	Investigating agency; forensic and digital-forensics work.	Boston.com search-warrant report; WPRI digital footprint. [26] [27] [28]	SECONDARY_REPORTED
ENT22	Trooper Kyle Pavao	Pavao	person	MSP trooper testifying re Surface Pro laptop searches.	WPRI digital footprint report. [28]	SECONDARY_REPORTED
ENT23	Patrick Clancy wrongful-death suit	Patrick civil suit	document	Malpractice/wrongful-death civil complaint filed Jan 2026 against ENT18, ENT19 and others.	WCVB, Globe, other civil-suit reporting. [7] [21] [6]	SECONDARY_REPORTED
ENT24	Lindsay Clancy malpractice suit	Lindsay civil suit	document	Civil complaint by ENT1 alleging negligent psychiatric care and injury including postpartum psychosis.	Globe, NewsNation, Yahoo, [21] [6] [29] [24]	SECONDARY_REPORTED

entity_id	canonical_name	aliases	entity_type	known_role / function	source / basis	source_status
ENT25	Lindsay Clancy journals	journals	document	Handwritten journals recovered from ENT13, including mental-state and medication tracking; read in court.	Boston Globe, Patriot Ledger, CBS Boston. ^[27] ^[11] ^[30]	SECONDARY_REPORTED
ENT26	911 call by ENT2	Patrick 911 recording	evidence	Audio recording of ENT2's emergency call on Jan 24, 2023; admitted but impounded from public distribution.	<u>Boston.com</u> , NBC Boston, WCVB, CNN. ^[15] ^[16] ^[17] ^[18]	SECONDARY_REPORTED
ENT27	Autopsy photographs of children	autopsy photos	evidence	Crime-scene and autopsy photographs of ENT3-ENT5; usable in court, restricted from public recording.	<u>Boston.com</u> , NBC Boston, WCVB. ^[45] ^[46] ^[47]	SECONDARY_REPORTED
ENT28	Exercise bands	workout / exercise bands	device	Alleged ligatures used in strangulation; shown to jury during trial.	USA Today, CNN. ^[5] ^[18]	SECONDARY_REPORTED
ENT29	Knife recovered at scene	knife	device	Sharp instrument with partial friction-ridge impression; stipulated forensic facts.	Fox News trial coverage. ^[31]	SECONDARY_REPORTED
ENT30	Surface Pro laptop	family Surface Pro	device	Laptop found in ENT13's basement; subject of digital-forensics testimony.	WPRI. ^[28]	SECONDARY_REPORTED
ENT31	Lindsay Clancy smartphone	Lindsay's phone	device	Smartphone providing search-history and messaging data analyzed by MSP.	WPRI, <u>Boston.com</u> . ^[28] ^[29]	SECONDARY_REPORTED

B. Provisional event registry

Note: EVENTS are described neutrally; many are EVENT_CANDIDATE pending primary-document confirmation. Time fields distinguish Clock 2 (real-world event time). Clock 1 (proceeding order) and Clock 3 (information order) are noted qualitatively.

event_id	neutral_description	participants (entities)	event_time (Clock 2)	temporal_precision	location	asserted_or_documented_by (who + source)	supporting_sources	conflicting_source
EV1	ENT1 reportedly begins intensified psychiatric care related to postpartum mental health after birth of ENT5.	ENT1, ENT18, ENT17	May–Sept 2022 (postpartum period; care beginning Sept 15, 2022)	APPROXIMATE / INTERVAL	Outpatient settings (ENT17, telehealth)	Reported in civil suits and timeline articles; attributed to ENT18's testimony and complaint narrative. ^[10] ^[24] ^[6] ^[7]	, , ,	none noted
EV2	ENT1 is evaluated at Women & Infants behavioral health program and reportedly told she does not have postpartum depression.	ENT1, ENT16 staff	Dec 20, 2022	EXACT (date)	ENT16 (Providence / Rhode Island)	Reported via prosecutor Sprague's description and later trial coverage. ^[10] ^[20] ^[21] ^[23]	, , ,	none noted
EV3	ENT1 reportedly expresses suicidal thoughts and thoughts of harming children to ENT2 in late Dec 2022.	ENT1, ENT2	"End of December 2022"	APPROXIMATE	ENT13 or home context	Reported as ENT2's later statement to police and trial testimony summaries. ^[10] ^[2] ^[21]	, ,	none noted
EV4	ENT1 self-admits to ENT14 for inpatient psychiatric care around New Year's.	ENT1, ENT14 staff, ENT20	Jan 1–5, 2023	INTERVAL (Jan 1 admit, Jan 5 discharge)	ENT14	Reported via prosecutor Sprague, ENT20's trial testimony, ENT2's testimony, and civil suits. ^[19] ^[10] ^[22] ^[20] ^[21] ^[6]	, , , , ,	none noted
EV5	ENT1 discharged from ENT14 with outpatient follow-up arranged; reportedly prescribed anti-anxiety and sleep medications.	ENT1, ENT20, ENT18	Jan 5, 2023 (afternoon)	APPROXIMATE / EXACT DATE	ENT14	ENT20's testimony and ABC11/Boston 25 reports. ^[12] ^[20] ^[25]	, ,	none noted

event_id	neutral_description	participants (entities)	event_time (Clock 2)	temporal_precision	location	asserted_or_documented_by (who + source)	supporting_sources	conflicting_source
EV6	ENT1 allegedly tracks medications, symptoms, and intrusive thoughts in journals and a medical diary.	ENT1, ENT25	Oct 13, 2022 – Jan 18, 2023 (per recovered journal range)	INTERVAL	ENT13 (journals seized there)	MSP Captain Santos and other officers reportedly testified about seizure and contents; both sides read excerpts in court. ^[27] ^[11] ^[30]	, ,	none noted
EV7	ENT1's mental-health symptoms reportedly escalate (insomnia, intrusive thoughts, suicidal ideation) with multiple medication changes through late 2022.	ENT1, ENT18, ENT19, other providers	Sept–Dec 2022	INTERVAL	Outpatient and hospital settings (ENT17, ENT15, ENT16)	Described in timelines, civil complaints, and testimony by ENT18/ENT19. ^[19] ^[20] ^[21] ^[24] ^[32]	, , , ,	none noted; detail vary
EV8	ENT1 reportedly attends a day at Women & Infants program and is turned away from ongoing participation due to concerns about over-medication.	ENT1, ENT16 staff	Dec 20, 2022 (day program), follow-up Dec 21	APPROXIMATE / EXACT DATE	ENT16	Described via prosecutor narrative, civil-suit allegations, and later testimony referencing MyChart messages and program decision. ^[10] ^[20] ^[21] ^[23]	, , ,	none noted
EV9	ENT1 reportedly hears a "male voice" telling her to "take them with her" and that she should "do it now," according to ENT1's later description to ENT2 and civil-suit allegations.	ENT1, ENT2	Approx. week after Jan 24, 2023 (phone call); auditory phenomena alleged Nov 29, 2022–Jan 24, 2023	APPROXIMATE / INTERVAL	Phone call; ENT13 context	Reported from ENT2's testimony (phone call) and civil-suit complaint's description of auditory hallucinations. ^[33] ^[6] ^[24] ^[34]	, , ,	none noted
EV10	ENT2 runs errands (CVS and restaurant Three V) after ENT1 suggests takeout, leaving children at ENT13 with ENT1.	ENT1, ENT2, ENT3–5, CVS staff, restaurant staff	Evening of Jan 24, 2023	APPROXIMATE	ENT13; local CVS; Three V restaurant (Plymouth)	ENT2's trial testimony and USA Today recap; CVS manager and restaurant hostess testified briefly. ^[5] ^[8] ^[35]	, ,	none noted
EV11	ENT2 reports returning to ENT13, observing unusual quiet, blood in bedroom, ENT1 on ground outside, and children in basement with exercise bands around their necks.	ENT1, ENT2, ENT3–5, first responders	Evening of Jan 24, 2023	APPROXIMATE	ENT13	ENT2's testimony as summarized in USA Today and CNN; 911 call played in court but not public. ^[5] ^[36] ^[18]	, ,	none noted
EV12	ENT2's 911 call is made, recorded, and later admitted into evidence under limitations on public distribution.	ENT2, ENT26, ENT11	Evening of Jan 24, 2023 (real-world call); admitted June–July 2026 rulings	APPROXIMATE (call), EXACT (rulings dates)	ENT13 (call), ENT12 (rulings)	Described in Boston.com pretrial coverage and evidentiary-ruling reports. ^[15] ^[17] ^[12] ^[18]	, , ,	none noted
EV13	Autopsy and crime-scene photographs and 3D home model are authorized for use in trial, with restrictions on public release.	ENT11, ENT27, ENT13, forensic staff	Pretrial hearing June 29, 2026 and subsequent orders	EXACT (ruling dates)	ENT12	WCVB and Boston.com evidentiary-ruling reports. ^[17] ^[12]	,	none noted
EV14	Criminal trial of ENT1 begins, with opening statements and ENT2 called as first witness for Commonwealth.	ENT1, ENT2, ENT6–9, ENT11, jury	July 27, 2026 (trial day 1)	EXACT DATE	ENT12	Reuters, Boston 25, AP, Patriot Ledger photographs. ^[11] ^[4] ^[1] ^[9]	, , ,	none noted

event_id	neutral_description	participants (entities)	event_time (Clock 2)	temporal_precision	location	asserted_or_documented_by (who + source)	supporting_sources	conflicting_source
EV15	Over first two days of trial, ENT2 testifies for both prosecution and defense regarding family history, mental-health treatment, and Jan 24 sequence.	ENT2, ENT1	July 27–29, 2026	INTERVAL	ENT12	Boston Globe, USA Today, CBS Boston, Court-TV/YouTube description. ^[2] ^[5] ^[8] ^[35] ^[36]	,,, ,	none noted
EV16	MSP and other witnesses testify about ENT1's journals, medication list, and digital search history, including sociopathy and mental-health queries.	ENT21, ENT22, ENT25, ENT30–31	Early–mid Aug 2026 (trial days ~9–13)	APPROXIMATE	ENT12	Boston Globe journal-entries story; Patriot Ledger; WPRJ digital-footprint report; <u>Boston.com</u> search-warrant summary. ^[27] ^[11] ^[26] ^[28]	,,,	none noted

Clock 1 (proceeding order) is implicitly given by trial day references (EV14–EV16) and pretrial hearings (EV13), while Clock 3 (information order) is reflected in when articles, suits, and affidavits were published relative to events and proceedings. ^[3] ^[15] ^[6]

C. Temporal anchors

These are time assertions likely to be central in later reconstruction. All are SOURCE_STATUS = SECONDARY_REPORTED at this stage.

temporal_assertion_id	event_id	time / range (Clock 2)	precision	asserted_by / basis	source	conflicting_temporal_assertions
TA1	EV4	Jan 1–5, 2023 (ENT1 inpatient at ENT14)	INTERVAL	ENT20's trial testimony, ENT2's testimony, prosecutor timeline narratives.	ABC11, Boston 25, <u>Boston.com</u> timeline, Globe lawsuits. ^[19] ^[22] ^[20] ^[21] ^[6] ^[24]	None clearly reported.
TA2	EV2 / EV8	Dec 20, 2022 (Women & Infants evaluation/day program); Dec 21, 2022 follow-up MyChart exchange.	EXACT DATE (per reports)	Prosecutor Sprague's timeline description; trial coverage quoting Jollotta; civil complaints.	<u>Boston.com</u> timeline; Globe; N.Y. Post; Globe lawsuits. ^[10] ^[20] ^[21] ^[23] ^[6] ^[24]	None noted; granularity may differ by source.
TA3	EV11 / EV12	Evening of Jan 24, 2023 (errands, discovery, 911 call).	APPROXIMATE	ENT2's testimony summaries and CNN/USA Today trial coverage.	USA Today, CNN, Boston Globe. ^[5] ^[35] ^[18] ^[2]	Exact clock-time not reported; UNKNOWN.
TA4	EV14	July 27, 2026 (opening statements; ENT2 first witness).	EXACT DATE	Reuters and local trial reporting.	Reuters, Boston 25, AP. ^[1] ^[4] ^[3]	None.
TA5	EV15	July 27–29, 2026 (two days of ENT2 testimony).	INTERVAL	Boston Globe and USA Today trial-day descriptions.	Boston Globe, USA Today, CBS Boston. ^[1] ^[5] ^[8] ^[20]	Minor discrepancies in "day" numbering, but same interval.
TA6	EV13	June 29, 2026 (ruling allowing 911 call and photos) and July 23–24, 2026 (impoundment orders).	EXACT DATES	WCVB and NBC Boston evidentiary-ruling reports; <u>Boston.com</u> pretrial hearing report.	WCVB, NBC Boston, <u>Boston.com</u> . ^[17] ^[16] ^[15] ^[12]	None.

temporal_assertion_id	event_id	time / range (Clock 2)	precision	asserted_by / basis	source	conflicting_temporal_assertions
TA7	EV6	Oct 13, 2022 – Jan 18, 2023 (range of recovered journal entries).	INTERVAL	MSP officer testimony reported by Globe; seizure and inventory narrative.	Boston Globe journal article. ^[22]	None.

D. Provenance / information chains

These chains emphasize Clock 3 (information order) and lineage; they do not treat repetition as independent corroboration.

Chain 1 – Journals and mental-state entries

- **Originating_source:** ENT25 (handwritten journals kept by ENT1 at ENT13).^{[27] [11]}
- → **Seizure:** MSP officers (e.g., Captain Santos) seize journals pursuant to search warrants; documented in warrant returns (not yet ingested here).^{[26] [27]}
- → **Record:** Journals and a postpartum workbook are cataloged as evidence; descriptions appear in warrant affidavits and inventory lists.^{[11] [26]}
- → **Courtroom use:** Prosecution and defense read selected passages aloud to the jury during trial day 5.^{[27] [11]}
- → **Secondary reporting:** Boston Globe, Patriot Ledger, CBS Boston summarize specific quotes and contextualize them in narrative articles.^{[30] [11] [27]}

Lineage classification: same_known_origin (all downstream accounts trace to the same physical journals).

Chain 2 – 911 call by ENT2

- **Originating_source:** ENT26 audio recording generated by emergency dispatch system when ENT2 called on Jan 24, 2023.^{[15] [17]}
- → **Record:** 911 recording stored by dispatch; later referenced in pretrial motions and evidentiary filings.^[12]
- → **Court rulings:** ENT11 authorizes use at trial with limiting instruction; separately orders impoundment from public recording/streaming and media reproduction.^{[16] [17] [15]}
- → **Trial use:** Recording played to jury; ENT2 temporarily removed from courtroom to avoid hearing his own call.^{[2] [5] [18]}
- → **Secondary reporting:** Boston Globe, CNN, USA Today summarize content (e.g., ENT2 reportedly saying “She killed the kids”), but audio itself is not publicly disseminated.^{[5] [18] [2] [15]}

Lineage classification: same_known_origin (all descriptions rely on the same call; none independent).

Chain 3 – Digital search-history claims

- **Originating_source:** Electronic data from ENT30 (Surface Pro laptop) and ENT31 (ENT1 smartphone), extracted under MSP search warrants.^{[28] [26]}
- → **Record:** MSP forensic reports and affidavits noting search terms (e.g., “can you treat a sociopath,” mental-health queries, alleged “ways to kill” research) and limitations on user attribution and timing resolution.^{[26] [28]}
- → **Witness testimony:** Trooper Pavao and other investigators testify about extraction process, visible search terms, and inability to determine specific user for laptop queries.^[28]
- → **Secondary reporting:** WPRI and [Boston.com](#) articles summarize search terms and highlight prosecution and defense framing (e.g., sociopathy vs mental-health research).^{[26] [28]}

Lineage classification: partially_shared_lineage (smartphone-based searches vs laptop-based searches may involve different originating devices and users, though reporting often treats them together).

Chain 4 – Mental-health treatment chronology

- **Originating_source:** Clinical records from ENT17, ENT18, ENT19, ENT14, ENT15, ENT16 and related systems.^{[10] [32] [20] [21] [24]}
- → **Civil complaints:** ENT23 and ENT24 embed excerpts and summaries from these records, framing alleged negligence and diagnostic failures.^{[21] [24] [6] [7] [29]}
- → **Trial testimony:** ENT18, ENT19, ENT20 and others testify about their encounters with ENT1, diagnoses, medications, and risk assessments.^{[19] [23] [20] [25]}
- → **Secondary reporting:** [Boston.com](#), Globe, NewsNation, Yahoo aggregate these materials into timelines and analyses.^{[32] [20] [24] [29] [10] [21]}

Lineage classification: partially_shared_lineage (many accounts derive from overlapping medical records but with differing selective quotations and emphases).

E. Important propositions (neutral, unresolved)

All proposition statuses are **UNRESOLVED** pending primary records and formal evidentiary analysis. Claims are grouped but not weighed.

proposition_id	neutral_question / proposition	claims_supporting (description + asserted_by + source)	claims_conflicting / qualifying	source_lineages	status
P1	Did ENT1 experience postpartum psychosis (including auditory hallucinations) between late 2022 and Jan 24, 2023?	ENT1's civil complaint alleges auditory hallucinations from Nov 29, 2022 to Jan 24, 2023, including a commanding male voice; defense opening and later testimony emphasize postpartum psychosis. [24] [24] [6] [34]	Some providers (e.g., Women & Infants psychiatrist) reportedly concluded ENT1 did not have postpartum depression or bipolar; initial McLean diagnosis recorded as major depressive disorder "without psychotic features;" and ENT1 at times denied suicidal ideation during intake. [10] [20] [24] [25] [19]	Chain 4 (clinical records) and Chain 1 (journals) plus opening-statement projections.	UNRESOLVED
P2	Did medication changes and polypharmacy significantly worsen ENT1's mental state before Jan 24, 2023?	ENT23 and ENT24 allege overmedication, rapid prescription of multiple psychotropics, and deterioration coincident with drugs like Seroquel and antidepressants; ENT2's civil complaint states that adequate care would likely have prevented the children's deaths. [24] [6] [7] [29] [24]	Prosecution has suggested ENT1 did not consistently take medications as prescribed and questioned severity of her illness; some providers recommended stopping or adjusting medications, implying medications were modifiable risk factors rather than sole cause. [6] [11] [20]	Chain 4 (civil suits + records) and trial projections.	UNRESOLVED
P3	What sleep pattern did ENT1 have in the weeks before Jan 24, 2023?	Civil suits and timelines describe persistent insomnia; ENT1 reportedly visited ER after ~48 hours without sleep; journals include entries about sleep quality and intrusive thoughts. [10] [24] [27] [11]	Some clinical notes or testimony may record nights of "sleeping well" or improved sleep with medications (e.g., Valium entries "slept well" then "horrible intrusive thoughts"), suggesting variable patterns. [30] [11]	Chain 1 (journals) and Chain 4 (clinical records).	UNRESOLVED
P4	What exact sequence of actions occurred in ENT13 on the evening of Jan 24, 2023?	ENT2's testimony describes leaving for errands after ENT1 called in takeout, returning to a quiet house, seeing blood, finding ENT1 outside, then discovering ENT3-ENT5 in basement with exercise bands. [5] [35] [18] [2]	No alternative full sequence has been reported; however, exact timing, internal mental state of ENT1, and minute-by-minute actions remain unestablished in available secondary sources; primary transcripts and forensic reconstructions are needed.	Chain 2 (911 call), Chain 3 (digital data), plus first-responder testimony summarized in CNN. [18] [25]	UNRESOLVED
P5	Did ENT1 research "ways to kill" or similar topics prior to Jan 24, 2023?	Search-warrant affidavits reportedly assert she used her phone and journal to "document her mental state ... and researching ways to kill." [26]	Affidavits as reported do not detail specific search terms or direct links between alleged research and particular methods; some later forensic testimony highlighted mental-health and sociopathy queries rather than explicit "ways to kill" phrases; exact content and context remain unclear. [28] [11]	Chain 3 (digital search-history) and search-warrant reporting.	UNRESOLVED
P6	What diagnoses did providers assign to ENT1 in 2022-early 2023?	Reports cite generalized anxiety disorder, chronic adjustment disorder with depressed mood, insomnia with mental-health condition, and consideration of bipolar; civil suits argue bipolar with postpartum onset was present and missed. [10] [21] [24] [19] [20]	Women & Infants psychiatrist reportedly found "no postpartum depression" and ruled out bipolar due to perceived lack of family history; McLean's provisional diagnosis "major depressive disorder severe without psychotic features" contrasts with later psychosis claims. [10] [24] [20] [25] [19]	Chain 4 (clinical records and lawsuits).	UNRESOLVED

proposition_id	neutral_question / proposition	claims_supporting (description + asserted_by + source)	claims_conflicting / qualifying	source_lineages	status
P7	What did ENT1 tell providers and ENT2 about intrusive thoughts of harming her children?	Timelines and civil suits describe ENT1 reporting intrusive thoughts and suicidal ideation, sometimes including harm-to-children content; ENT2 later told investigators and testified about her describing such thoughts in late December 2022. ^{[10] [21] [2] [6] [24]}	Precise wording, frequency, and whether statements were framed as obsessions without intent versus plans are not fully available in secondary reporting; some providers recorded no active plan to harm self or others during specific visits. ^{[19] [20] [25]}	Chain 4 (clinical records) and Chain 1 (journals).	UNRESOLVED

F. Prosecution T₀ projection (opening-statement framing)

All entries in this section are PROJECTION = PROSECUTION (interpretive views), not substrate facts.

- PROS1 – Theory of deliberate, planned killings.**
Prosecutors (ENT8, ENT9) assert that ENT1 “coldly and efficiently” strangled ENT4, ENT3, and ENT5 using exercise bands, sending ENT2 out on an errand to create an opportunity, and acting with deliberate premeditation and extreme atrocity or cruelty. ^{[4] [37] [1]}
This projection relies on ENT2’s description of errands, physical evidence (ENT28, ENT29), and digital data chains (Chain 3) as later explored in testimony. ^{[18] [5] [28]}
- PROS2 – Assertion of lucidity and criminal responsibility.**
The prosecution contends ENT1 was lucid and cognizant, not legally insane, when she killed the children, emphasizing that she planned the event, knew right from wrong, and showed task-oriented behavior (e.g., arranging errand timing, selecting ligatures). ^{[13] [1] [3]}
They frame postpartum symptoms as not reaching the threshold for lack of criminal responsibility and highlight diagnoses “without psychotic features” and risk assessments labeling her “minimal” risk at ENT14. ^{[20] [25] [19]}
- PROS3 – Use of 911 call and autopsy photos to support intent and manner.**
Prosecutors argued that ENT26 and ENT27 have “significant probative evidentiary value” in proving deliberate premeditation, extreme atrocity or cruelty, and ENT1’s state of mind, despite emotional impact. ^{[17] [12]}
This projection connects ENT2’s statements during the call (e.g., “She killed the kids”) and visual depiction of injuries to their theory of intentional homicide. ^{[17] [18]}
- PROS4 – Skepticism about medication-based explanations.**
Prosecutors suggest ENT1 may not have adhered to prescribed regimens and question the claimed severity and causative role of medications, implicitly countering civil-suit framing that overmedication led directly to the killings. ^{[6] [11]}
They use evidence such as bags of untaken pills to argue that non-compliance and other factors undercut a simple medication-failure narrative. ^{[5] [11]}

G. Defense T₀ projection

All entries in this section are PROJECTION = DEFENSE and remain interpretive, not substrate facts.

- DEF1 – Lack of criminal responsibility due to postpartum psychosis and bipolar disorder.**
Defense counsel (ENT10) acknowledges that ENT1 strangled her children but asserts she is not criminally responsible because she acted while suffering severe postpartum psychosis and bipolar disorder, including auditory hallucinations commanding her to kill herself and “take them with her.” ^{[14] [24] [34] [1] [3]}
This projection is tied to civil-suit allegations, journals describing disconnection from reality, and ENT1’s later report to ENT2 of a commanding male voice. ^{[33] [6] [27]}
- DEF2 – Overmedication and systemic treatment failures.**
The defense emphasizes that ENT1 sought help repeatedly but was subjected to poorly coordinated, over-intense medication regimens that worsened her condition, contributing to psychosis and suicidality. ^{[24] [7] [29] [21] [6]}
They point to rapid addition of multiple drugs, inadequate evaluation for bipolar, and decisions such as Women & Infants turning her away due to overmedication. ^{[23] [10] [20] [21]}
- DEF3 – Narrative of a loving, protective mother whose deterioration was missed.**
Defense references ENT2’s description of ENT1 as a caring mother and nanny/relative statements that she was diligent and protective, arguing that her eventual actions reflect a catastrophic, acute mental break rather than longstanding cruelty. ^{[38] [2]}
This projection draws on character testimony and journal passages expressing guilt, fear, and desperation about motherhood. ^{[11] [27]}
- DEF4 – Critique of McLean and other institutions.**
Defense cross-examination and external commentary highlight alleged understaffing and minimal engagement at ENT14 during holiday period, asserting that ENT1 did not receive adequate care or monitoring while her condition worsened. ^{[19] [23] [20] [21]}

They argue that discharging ENT1 as “safe” on Jan 5, 2023, and failing to ensure robust follow-up represented systemic failures contributing to the tragedy. ^[21] ^[6] ^[19]

H. Known evidence / document registry (provisional)

Classification here reflects current research access, not legal possession in the case; POSSESSED refers to apparently being in the criminal case file, not to our research corpus.

evidence_id	description	category	case possession status (criminal proceedings)	research access status	primary/secondary classification
DOC1	ENT26 – ENT2’s 911 call audio recording.	Audio evidence	POSSESSED by court; admissible; impounded from public recording. ^[15] ^[16] ^[17]	REFERENCED_NOT_POSSESSED (content not accessible here)	PRIMARY (court record) but only indirectly described via SECONDARY_REPORTED sources.
DOC2	ENT27 – Autopsy and crime-scene photographs of ENT3–ENT5.	Photographic evidence	POSSESSED; admissible; restricted from public recording. ^[15] ^[16] ^[17]	REFERENCED_NOT_POSSESSED	PRIMARY, accessible only via secondary descriptions.
DOC3	Search-warrant applications and affidavits for ENT31, ENT30, ENT13, medications, and blood samples (~299 pages).	Court & investigative documents	POSSESSED by court and investigators. ^[26]	REFERENCED_NOT_POSSESSED (unsealed but not ingested)	PRIMARY, currently summarized by SECONDARY_REPORTED article.
DOC4	ENT25 journals and postpartum workbook “Good Moms Have Scary Thoughts.”	Physical documents	POSSESSED as exhibits; read from at trial. ^[27] ^[11] ^[30]	PUBLICLY_REPORTED (partial quotations)	PRIMARY, with only partial content available.
DOC5	ENT23 Patrick civil complaint (wrongful-death/medical malpractice).	Civil court complaint	POSSESSED in Norfolk Superior Court; not part of criminal record per se. ^[2] ^[6] ^[24]	REFERENCED_NOT_POSSESSED (articles summarize)	PRIMARY for civil case; SECONDARY_REPORTED in this baseline.
DOC6	ENT24 Lindsay civil complaint (medical malpractice).	Civil court complaint	POSSESSED in Norfolk Superior Court. ^[6] ^[22] ^[24]	REFERENCED_NOT_POSSESSED	PRIMARY (civil), SECONDARY_REPORTED here.
DOC7	Clinical records from ENT17, ENT18, ENT19, ENT14, ENT15, ENT16 (diagnoses, medication lists, visit notes).	Medical records	POSSESSED by providers and likely subpoenaed/introduced in parts at trial. ^[14] ^[20] ^[21] ^[24] ^[32]	REFERENCED_NOT_POSSESSED	PRIMARY, but only reported excerpts accessible.
DOC8	Forensic reports on ENT28 (exercise bands) and ENT29 (knife) including friction-ridge impression assessment.	Forensic lab documents	POSSESSED; some facts stipulated at trial. ^[31] ^[5] ^[18]	REFERENCED_NOT_POSSESSED	PRIMARY, summarized by trial coverage.
DOC9	Digital extraction reports for ENT30 and ENT31 (search terms, timelines).	Forensic digital evidence	POSSESSED by MSP and possibly entered as exhibits. ^[26] ^[28]	REFERENCED_NOT_POSSESSED	PRIMARY, summarized via secondary articles.
DOC10	Pretrial evidentiary-ruling orders on autopsy photos, 911 call, and 3D home model.	Court orders	POSSESSED by ENT12. ^[17] ^[15] ^[12] ^[16]	REFERENCED_NOT_POSSESSED	PRIMARY, existing only as described in news reports.

I. Baseline unknowns (explicitly tracked)

Examples of first-class UNKNOWNs and ambiguities:

- **UN1 – Exact timestamps within Jan 24, 2023 event sequence.**
Secondary reporting gives “morning pediatrician visit,” “evening errands,” and “return to quiet house,” but clock-times (e.g., 6:12 p.m.) are not available here; these remain UNKNOWN until CAD, dispatch logs, and forensic timelines are ingested. ^[35] ^[18] ^[5]
- **UN2 – Full text of ENT25 journal entries and ENT26 911 call.**
Only selected quotes and descriptions are reported; without full transcripts or exhibits, contextual nuance, ordering, and possible mitigating or aggravating language remain UNKNOWN. ^[2] ^[30] ^[15] ^[18] ^[27]
- **UN3 – Complete list and chronology of all medications, doses, and adherence.**
Articles reference “13 meds” and various drugs (Zoloft, Prozac, Seroquel, Valium, etc.), but comprehensive tables, serum levels, and adherence patterns are not yet available; baseline pharmacological sequence thus remains PARTIAL and largely UNKNOWN. ^[7] ^[29] ^[24] ^[11] ^[21]

- **UN4 – Independence of accounts.**
Many narratives (civil suits, opening statements, news timelines) appear to draw from overlapping medical records and investigative documents; without direct comparison of underlying primary sources, independence of accounts is UNKNOWN.
- **UN5 – Complete diagnostic reasoning by each provider.**
Reporting highlights selected phrases (e.g., “minimal risk,” “no postpartum depression”) but not full differential diagnoses, risk assessments, or structured reasoning; these remain UNKNOWN pending clinical records.^{[20] [24] [19] [21]}
- **UN6 – Exact search terms, timestamps, and user attribution for all alleged digital queries.**
While phrases such as “can you treat a sociopath?” and “ways to kill” are reported, precise logs, context (e.g., follow-up searches), and technical attribution to individual users are not fully available; detailed digital-activity reconstruction is UNKNOWN.^{[28] [26]}
- **UN7 – Full content of opening statements and all witness testimony.**
Only excerpts and summaries are available via articles and partial videos; without transcribed openings and trial transcripts, many nuances (hedging, qualifiers, line of questioning) are UNKNOWN.^{[32] [36] [1] [4] [14]}
- **UN8 – Comprehensive set of exhibits and whether each was admitted, excluded, or limited.**
Some categories (photos, 3D model, 911 call) are described, but full exhibit lists, objection histories, and limiting instructions remain UNKNOWN.^{[12] [17]}

J. Source registry (provisional)

Below are key sources used in this T₀ baseline; IDs correspond to the tool outputs (type:index). Publication date ≠ proceeding date.

V0 baseline limitations

This V0 baseline is intentionally conservative and **provisional**. It should be replaced or reconciled as soon as the primary evidence-packet parser and transcript ingestion become available:

- **Replace secondary time anchors with primary temporal data.**
TA1-TA7 and event times should be reconciled against CAD logs, dispatch records, hospital timestamps, and forensic timelines; approximate evening references must be replaced with exact or interval data derived from primary records.
- **Substitute article-level summaries of journals, 911 call, and clinical records with direct exhibit content.**
Chains 1-4 and propositions P1-P7 rely on news quotations and civil-complaint summaries; they should be rebuilt using:
 - Full text of ENT25 journals, ENT26 transcript, clinical notes, and search-warrant affidavits.

- Direct metadata (authorship, page ranges, exhibit numbers) from the criminal case file. ^[15] ^[24] ^[27] ^[26]
- **Clarify Clock 1 (proceeding order) using full trial transcripts.**
Current proceeding order is inferred from day-by-day reporting; once transcripts are available, each EVENT and PROJECTION should be tied to precise docket entries, witness sequences, and motion rulings, replacing inferred trial-day labels.
- **Disentangle source lineages and independence.**
Many claims are currently grouped under partially_shared_lineage; parsing primary records will allow explicit mapping of which statements are truly independent (e.g., different providers documenting similar symptoms versus multiple outlets quoting the same complaint).
- **Normalize entity and evidence IDs to official identifiers.**
ENT and DOC IDs in this baseline are local to V0; when exhibits, case numbers, and provider IDs are parsed from primary documents, they should be remapped to canonical identifiers (e.g., “Exhibit 12”, “Commonwealth’s Exhibit A-3”, “Tufts-MGH record 2022-11-16”).
- **Reevaluate proposition definitions against formal jury instructions and legal standards.**
P1–P7 are neutral factual questions likely to recur; once instructions, expert reports, and formal psychiatric evaluations are ingested, these propositions may need to be refined, merged, or split to match operative legal and clinical constructs (e.g., “lack of criminal responsibility” elements versus diagnostic criteria).
- **Avoid using this V0 for any probabilistic or weight-of-evidence analysis.**
Until primary records and transcripts are fully ingested, this dataset should be used only for system testing, schema validation, and pipeline development—not for assessing credibility, assigning evidentiary weight, or estimating guilt or innocence.

When the primary-document parser is available, each entry in sections A–H should be treated as a candidate to be **confirmed, corrected, or discarded** based on direct comparison with the official record, ensuring that projections (prosecution/defense), witness reports, and secondary summaries never silently become substrate facts.
